From the print options window, select the "fit to page" option, sometimes called the "scale to fit" option. This will create a margin and prevent the pages from being cut off during the printing process.

About This Craft

This paper snail craft was created as an activity for young students to go along with forest animal and creepy crawly units and themes! Print, cut out, and decorate the snail and leaf templates for a super easy and fun craftivity!

Materials

- Glue sticks
- Scissors
- Markers
- Snail & Leaf Templates (included below)
- Copy or Construction Paper

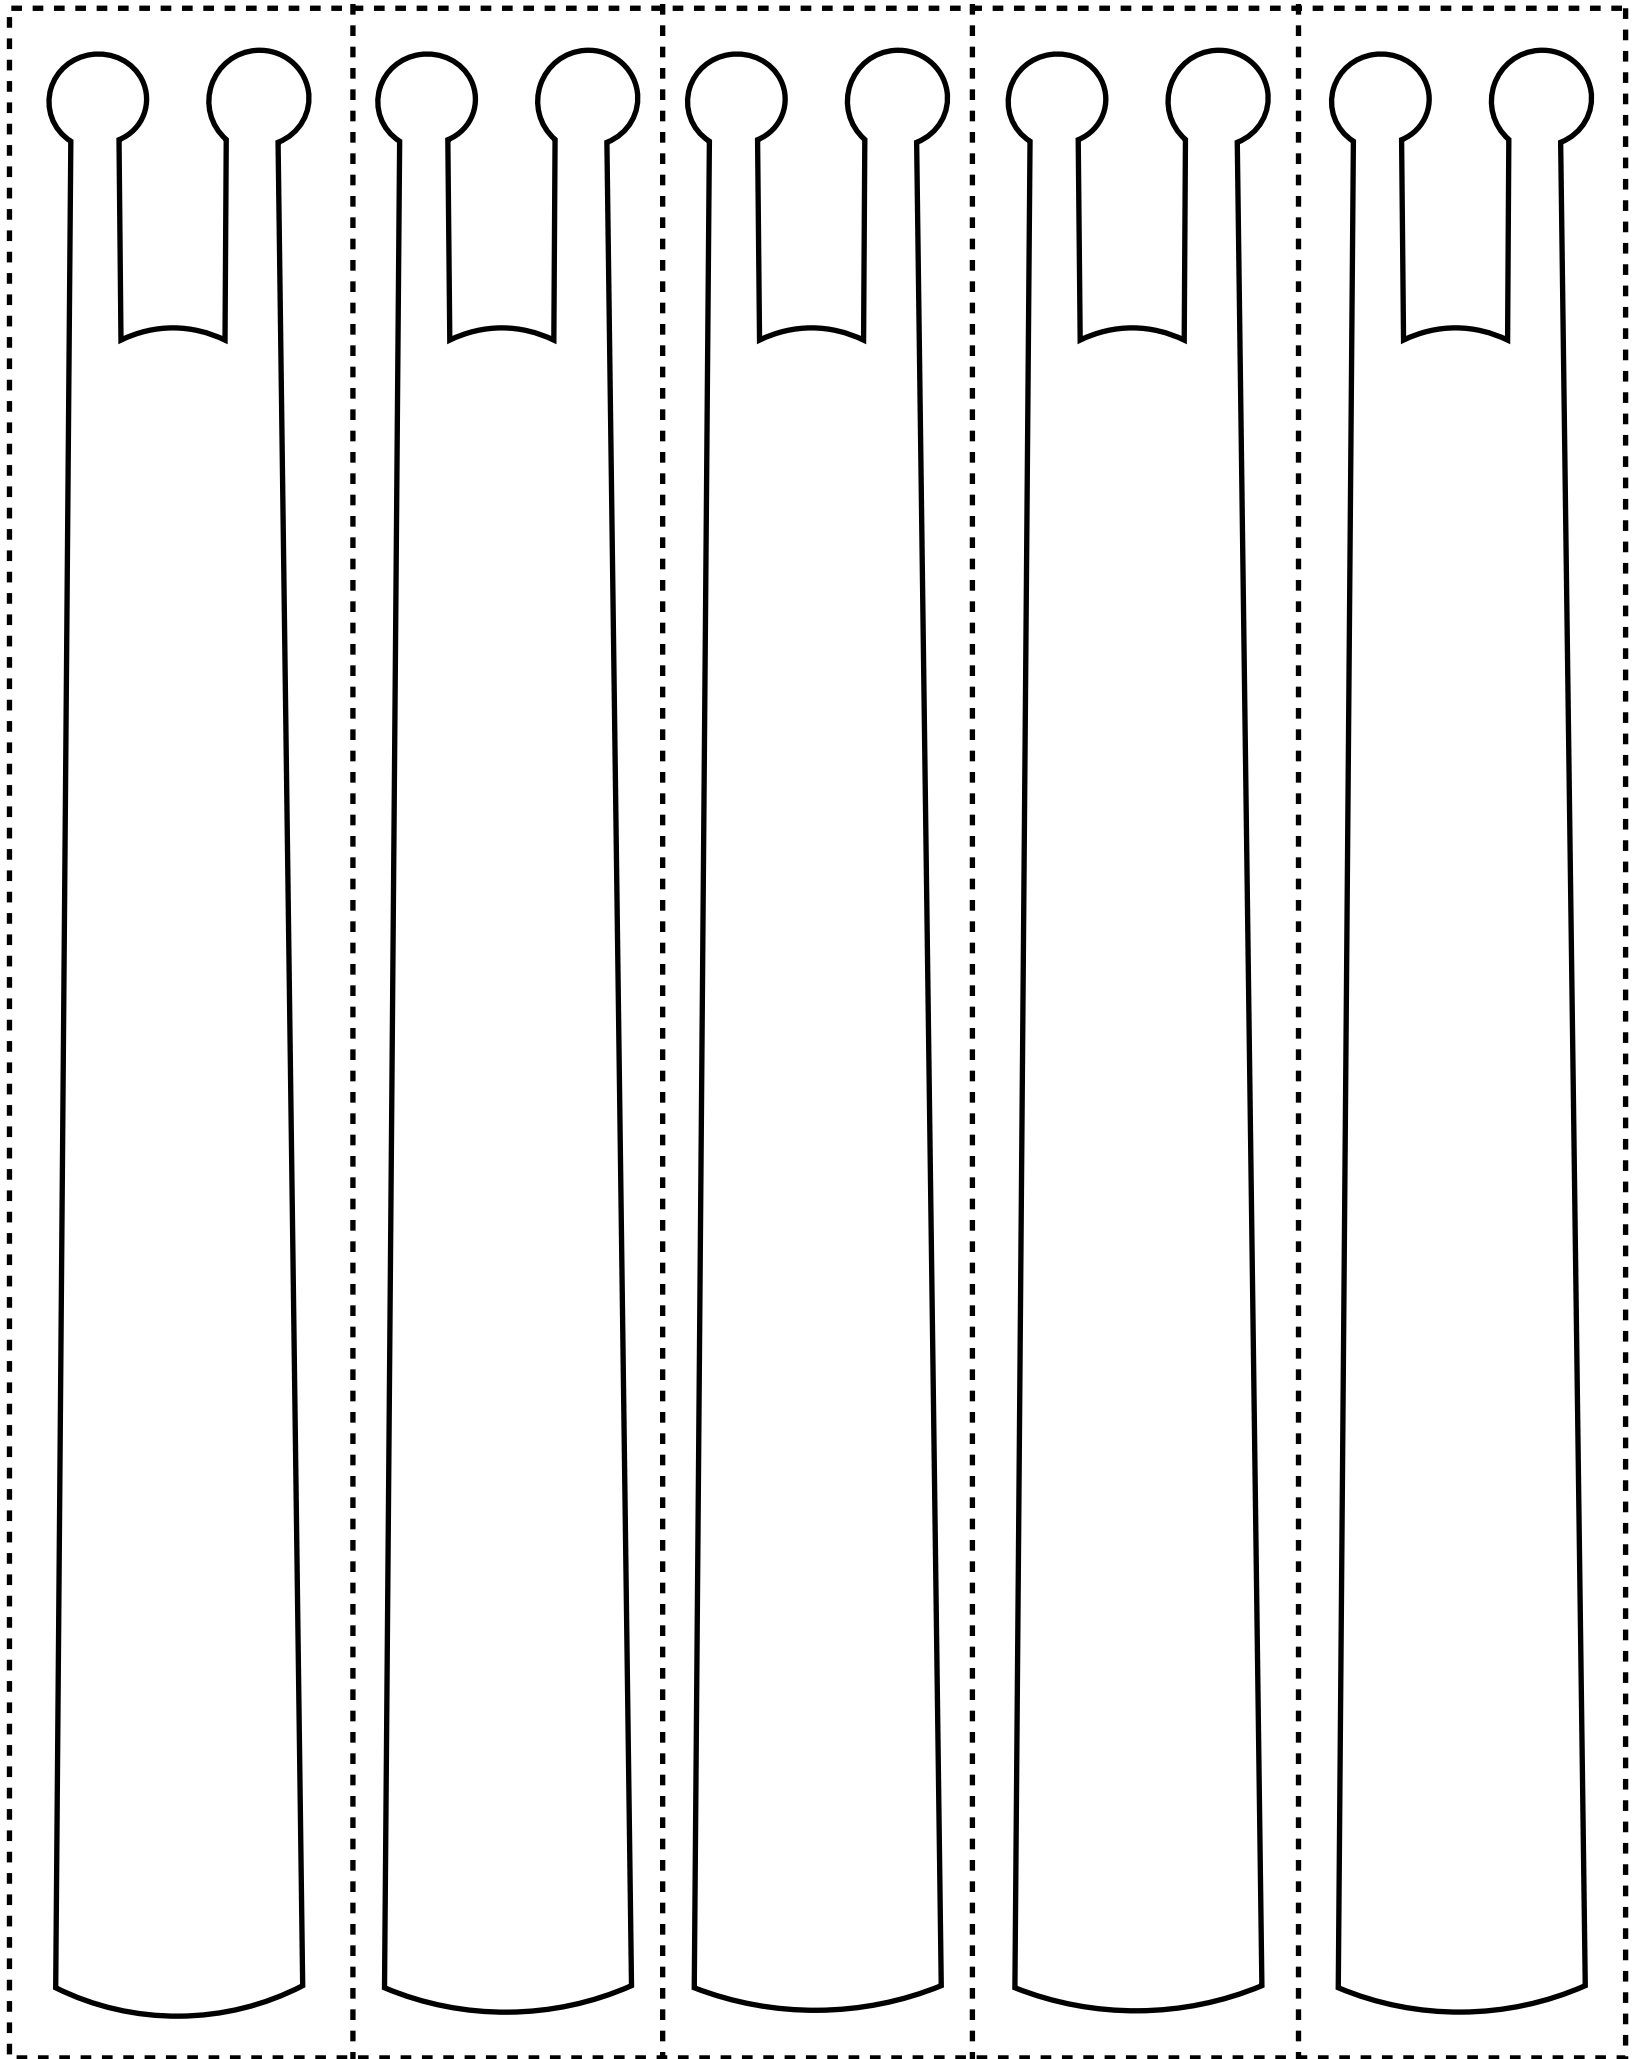

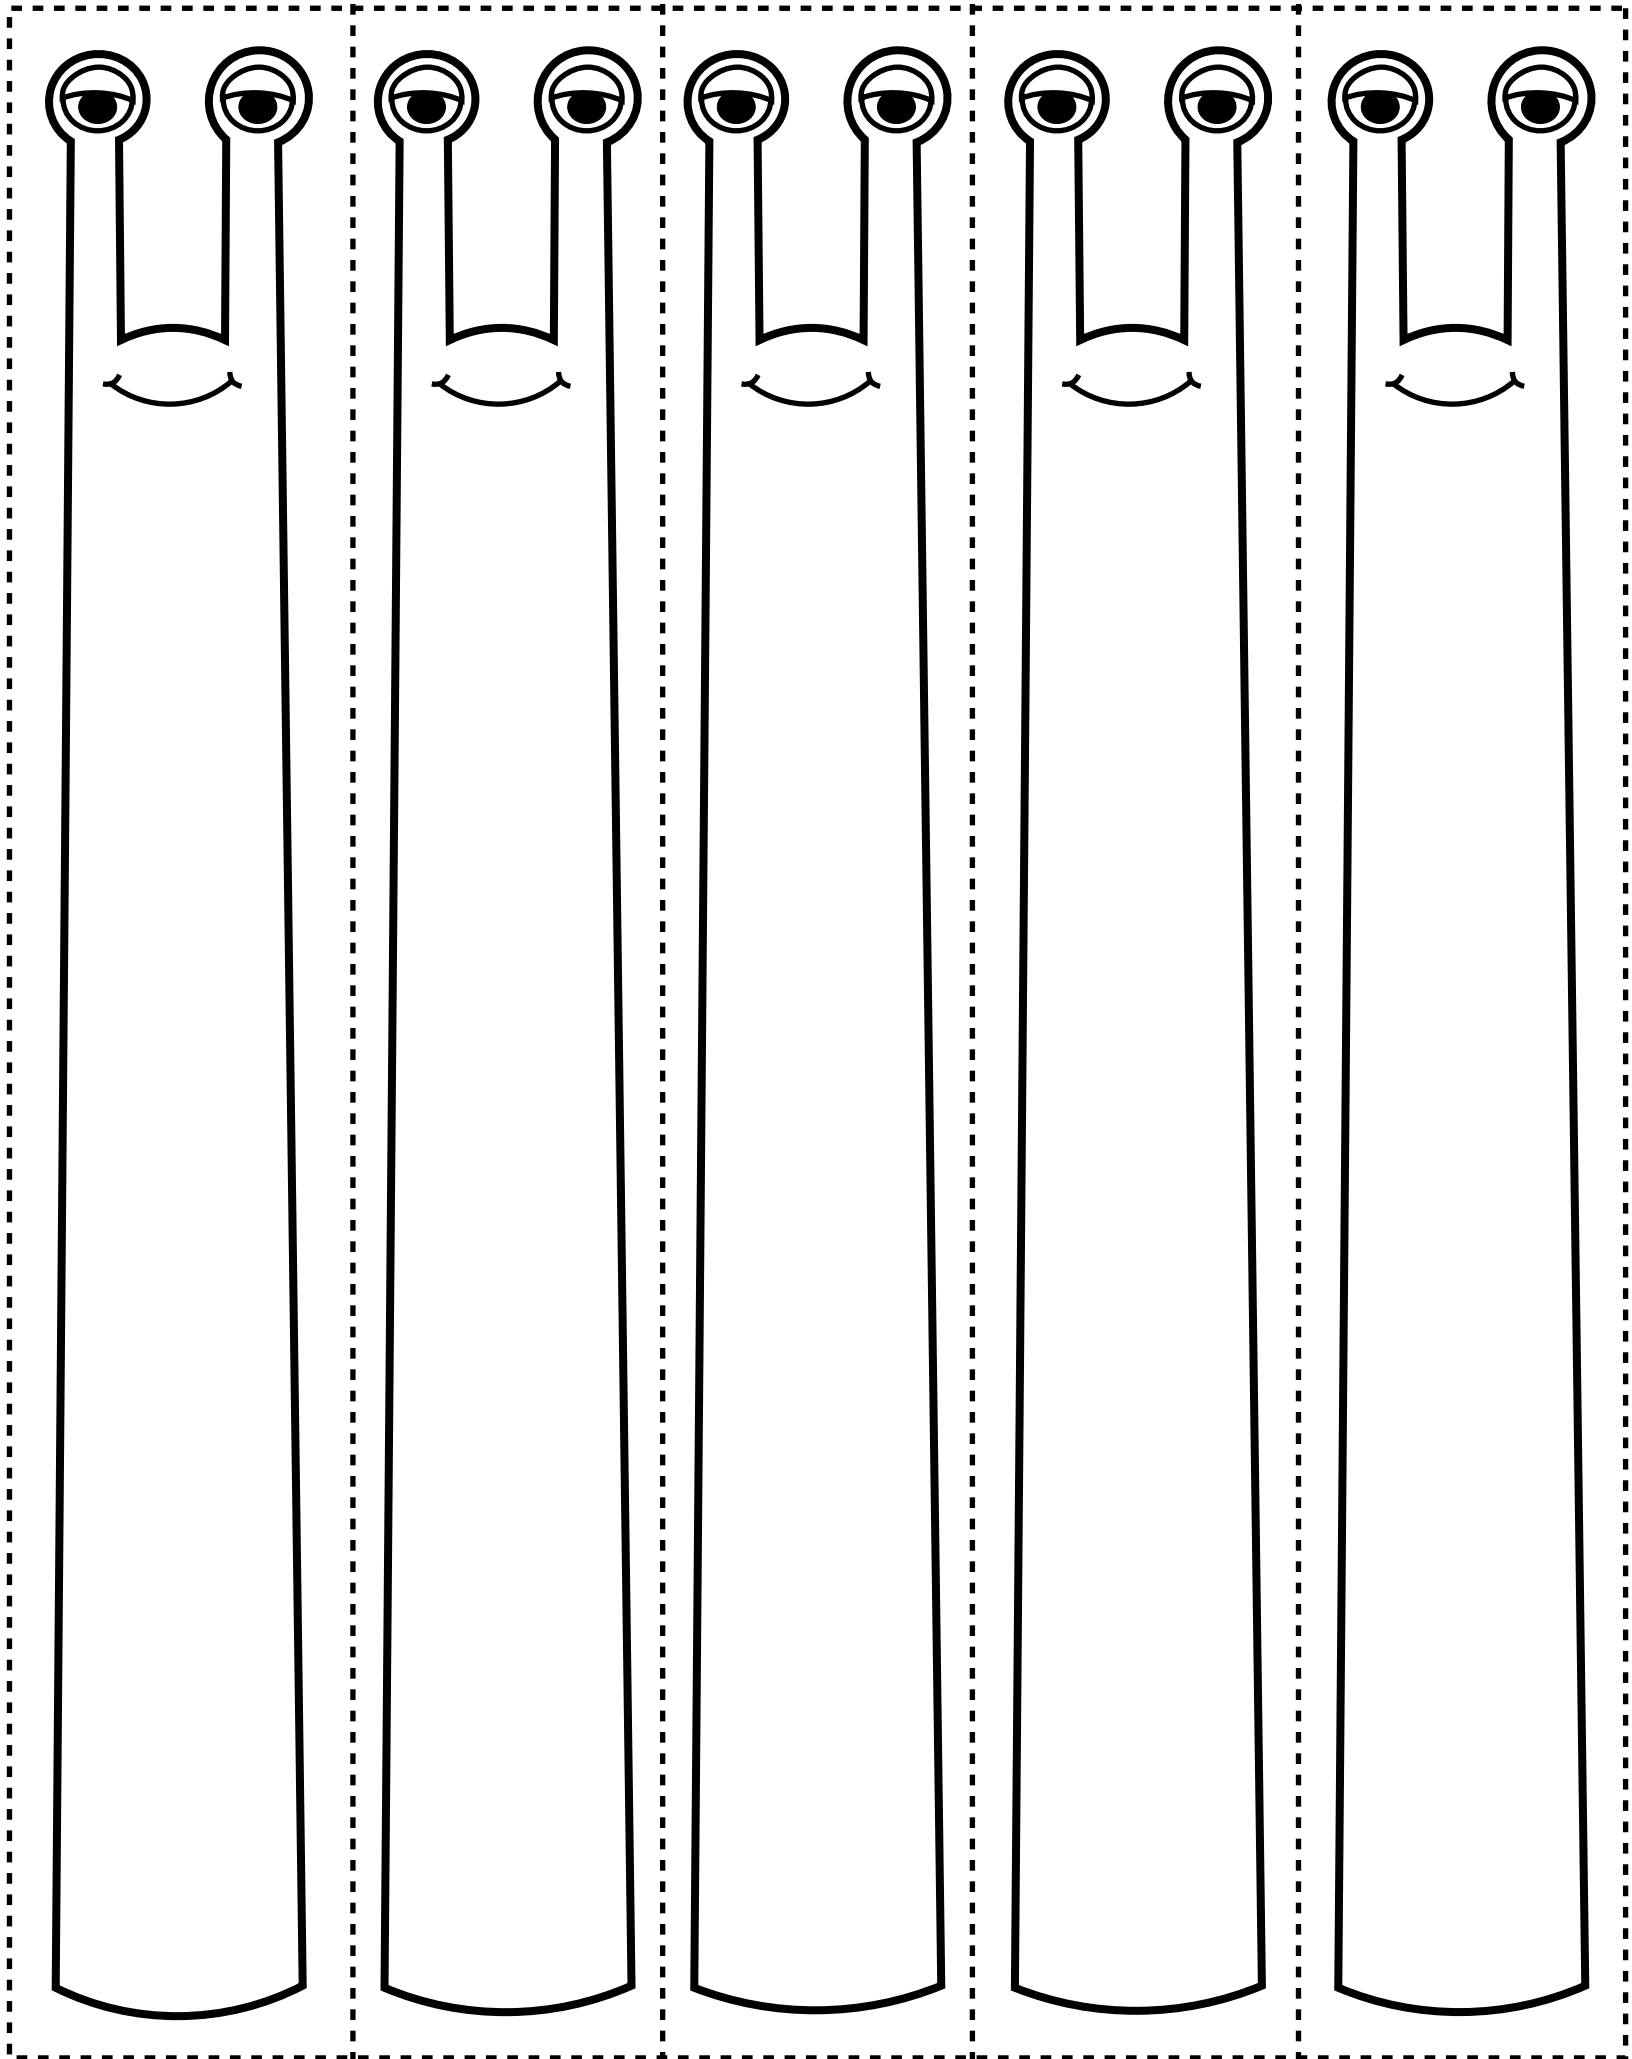

Preparation

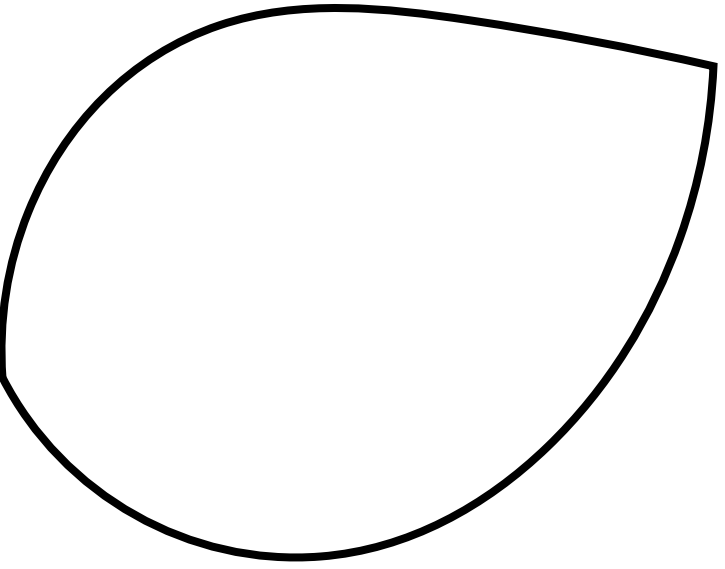

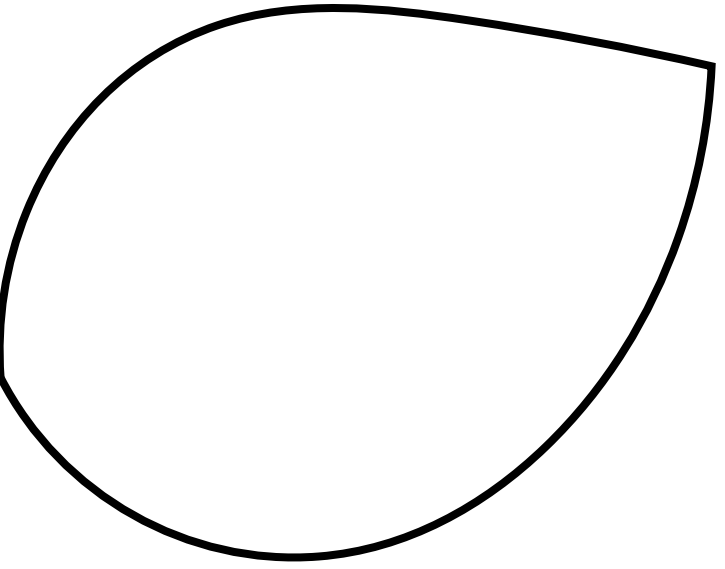

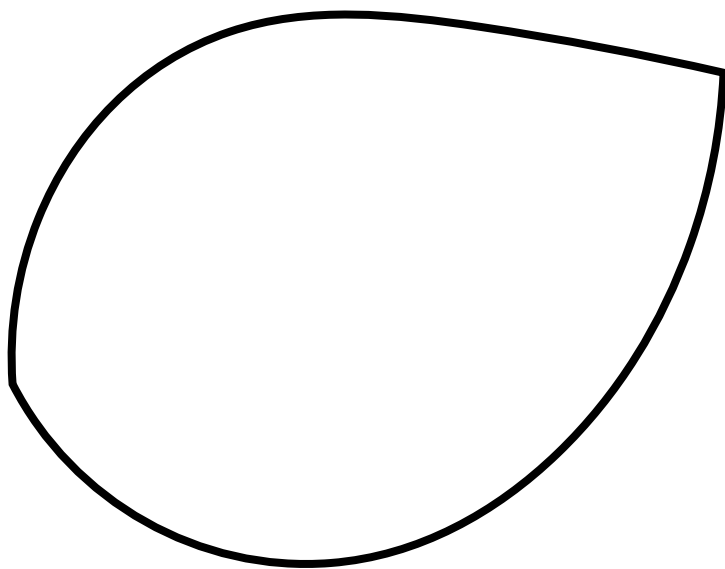

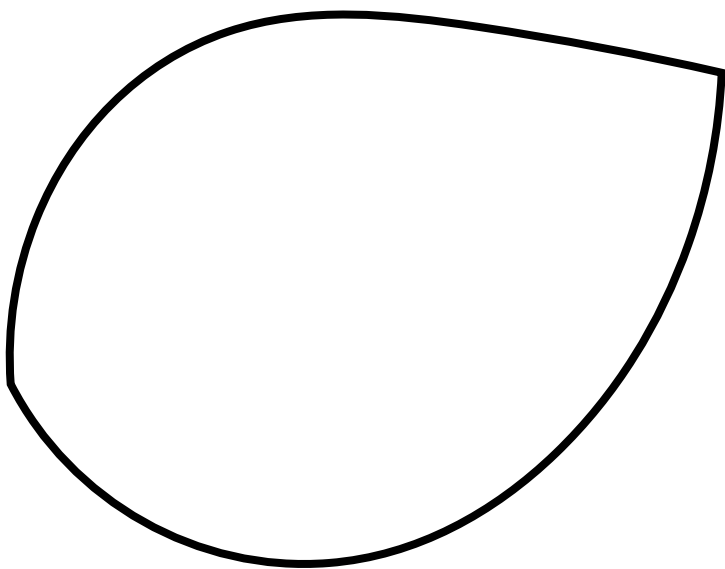

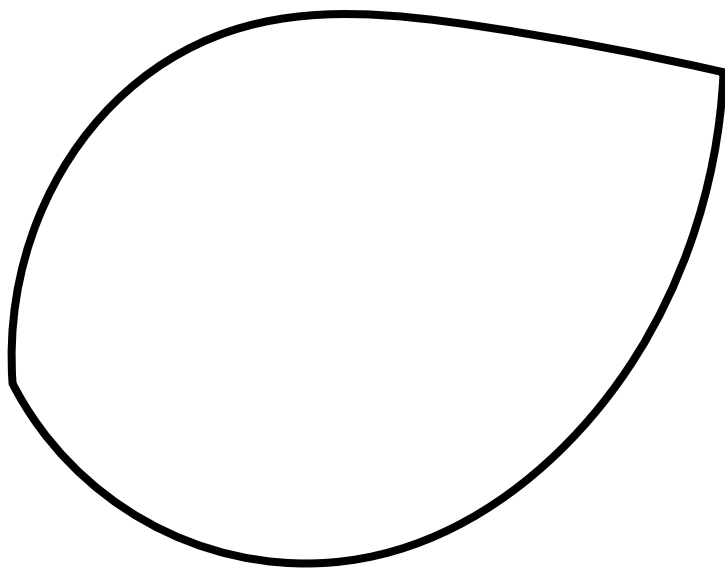

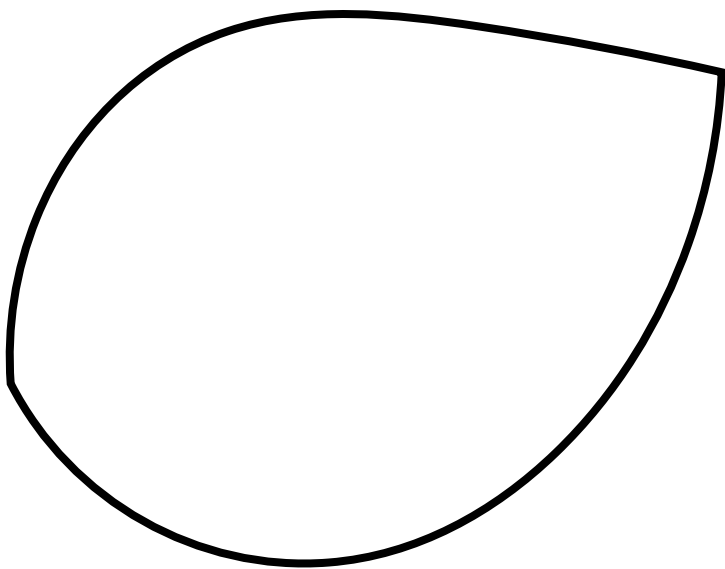

1. Pre-cut the snail shapes. I've included snail and leaf templates you can print on white or colored copy paper or, depending on your printer, directly onto construction paper. If you cannot print onto construction paper, you can print the templates on copy paper, then cut out the template you want to use and trace it on a piece of construction paper.
2. Cut apart the leaf templates. Make sure you have enough leaves and snails to give every student at least one!
3. Place paper snail templates, and leaf templates out on tables along with markers, glue and scissors.

Student Engagement

1. Students decorate the paper snail template while they are still flat, using markers.
2. Roll up the snail, starting from the end opposite from the eyes.
3. Finally, cut out and decorate the paper leaf, then glue their snail onto it!
4. A snail writing prompt is included as an optional literacy extension.

The logo is a circular emblem with a thick red outer border. Inside this border is a ring of small, colorful dots in red, blue, and green. The center of the logo features two stylized apples, one red and one green, with brown stems and green leaves. Below the apples, the words "Kindergarten" and "Nation" are written in a bold, dark blue, sans-serif font, stacked vertically. A small yellow starburst graphic is partially visible in the bottom left corner.
